

Vane pumps type PVL

variable displacement with mechanical compensator

obsolete components - availability on request

PVL are variable displacement vane pumps equipped with mechanical compensator ⑩ for outlet pressure and max displacement adjustment ⑦, ⑧.

These low-noise pumps are available in 3 different size, have flange ports according to ISO 3019/2 and are designed to operate with anti-wear oil according to DIN 51524...535 and fire-resistant fluids with same lubricating characteristics.

Wide variety of displacements: from 6,8 up to 43 cm³/rev.

Max pressure up to 150 bar.
